SUMMARY

Creative and detail-oriented Frontend Developer with hands-on experience building responsive, interactive user interfaces using HTML, CSS, JavaScript, React, and animation libraries like GSAP and Locomotive.js. Passionate about creating seamless and engaging user experiences with clean and maintainable code.

PROJECTS

Weather-App

Tech Stack: HTML, CSS, JavaScript

- Displays current weather conditions and forecasts for any location.
- Offers an easy-to-navigate design for quick access to weather data.
- Provides detailed hourly and weekly weather predictions, plus severe weather alerts.

twogocoo UI Clone with Scroll Animation

Tech Stack: HTML, CSS, Locomotive.js

- Developed a visually immersive twogoco landing ui clone with smooth scrolling and scroll-triggered animations.
- Integrated Locomotive.js for parallax and inertia scrolling effects.
- Emphasized layout composition and interactive visual storytelling.

To-Do List App

Tech Stack: React.js, Tailwind CSS

- Created a fully functional to-do list with add, delete, and mark-complete functionalities.
- Used React hooks (useState) and component-based structure for maintainability.
- Styled with Tailwind CSS for a modern, clean look.

TECHNICAL SKILLS

- **Web Technologies** : HTML, CSS, JavaScript, React, WordPress
- **Frameworks** : Tailwind CSS, Bootstrap
- **Library**: React JS, GSAP, Locomotive JS
- **Database** : Mongo DB
- **Version Control** : Git, Github, VS Code

EDUCATION

Government Autonomous College, Rourkela

Sep 2020 - Apr 2023

BSc. Computer Science

Saraswati Science Higher Secondary School, Bhawanipatna

Jul 2018- Mar 2020

Higher Secondary Education (Science)
